PERSONAL PROJECTS

Tabletop Finder

<https://github.com/vamazzuca/Tabletop-Finder>

- Tabletop Finder is a full-stack web application designed to connect board game enthusiasts, allowing them to discover and create tabletop gaming events in their city.
- Users can create a profile account and search for Tabletop events in their city to join.
- Frontend built with React, and Tailwind for a modern and customizable design.
- REST API Backend built with NodeJS and Express, providing a scalable and efficient server environment.
- Utilized MongoDB database for storing event and profile information.

Boardify

<https://github.com/vamazzuca/Boardify>

- A Full Stack e-Commerce site for selling mechanical keyboards.
- Users can create a profile account and browse the store to shop for their favorite products.
- Admin accounts can add, edit and delete products in order to keep the store up to date.
- Frontend built with React, SASS, and Material UI for icons and button styling.
- REST API Backend built with C# and .NET using ASP.NET Core.
- Used MySQL database for storing product, cart and profile information.

WORK EXPERIENCE

Mazzuca Contracting Ltd.

Administrative Assistant

Sherwood Park, Alberta

May 2020 - Present

- Utilized QuickBooks for bookkeeping tasks, including invoicing, expense tracking, and financial reporting.
- Organized physical files in a file cabinet, streamlining retrieval processes and enhancing overall office efficiency.
- Conducted regular reconciliations of financial data in QuickBooks to maintain accuracy and resolve discrepancies.
- Utilized a systematic approach to assess inventory levels, anticipating supply needs, and placing orders in a timely manner.

The Home Depot

Seasonal Sales Associate

Fort Saskatchewan, Alberta

May 2019 - August 2019

- Assessed customer needs, over the phone and in-store, to provide assistance and information on product features.
- Maintained knowledge of current promotions, exchange guidelines, payment policies and security practices.
- Built and maintained relationships with peers and other sales departments to drive team success.
- Used computer database resources to assist customers in locating and selecting items.
- Successfully contributed to our store's summer sales growth, propelling us to the top position in district-wide sales and securing bonuses for all employees.
